Dear Hiring Manager,

I am Avni Kanishk, a Computer Science Engineering undergrad in my third year of engineering. I am skilled in problem-solving related to Data Structures and Algorithms. I have a good understanding of Computer Science fundamentals like Object Oriented Programming, Database Management Systems, Computer Networks, and Operating Systems. I also possess the skills required for web development, currently mastering the MERN stack and having a keen interest in UI/UX Design.

Development is my favourite hobby and I would like to create an impact in the world while honing my developer skills. As a skilled developer with a strong foundation in web development and database management, I excel in crafting scalable, efficient and high quality software solutions. I leverage my expertise to drive innovative projects. With a keen eye for detail and a passion for problem-solving, I'm confident in my ability to deliver exceptional results and drive growth in a dynamic and collaborative environment. I'm excited to bring my technical expertise and passion for learning to a new challenge and contribute to a team dedicated to delivering outstanding software solutions.

Microsoft being a company with a diverse range of working technologies, will provide me the chance to contribute to iconic products like Windows, Office, Azure, and more. I'll have the opportunity to work on projects that can impact millions of people worldwide. It is an extraordinary place to showcase my developer skills, it would give me the platform to be a part of something substantial and use my skills to their best potential. I hope to be a developer of this amazing place and would be highly grateful for even getting to be interviewed for this position. Hoping to join you soon!

Sincerely,
Avni Kanishk
